The disclosure is objected to because of the following informalities: it appears that claim 6 is meant to read on fig. 5; on line 11 of the claim, "applied to sources" would better read -- supplied from sources --.

Appropriate correction is required.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The wide-band amplifier of Miyashita et al. includes a differential input stage 1 in cascade with a differential source follower stage 5a wherein each source follower transistor Tr4, Tr5 has its source coupled to a current source transistor Tr6, Tr7 and cross coupled to the gates of the current sources via compensation capacitors C1, C2.
